

DALE PETERSON

- Started career as NSA Cryptanalyst
- First ICS security assessment in 2000
- Founder of S4 Events
 - @digitalbond, Peterson@digitalbond.com
 - Youtube.com/s4events
 - Dale-Peterson.com

The background is a dark blue gradient. In the four corners, there are white, stylized circuit board traces. These traces consist of straight lines that turn at right angles, ending in small white circles, resembling electronic components or nodes on a board.

RISK = CONSEQUENCE X LIKELIHOOD

RISK = CONSEQUENCE X LIKELIHOOD

CONSEQUENCE

- Often ignored in risk reduction
- Often overestimated by security and operations
- Sets a cap on risk
- Easily communicated with executive management

EFFICIENT RISK REDUCTION:

Where will we get the most risk reduction for the next dollar or hour spent?

The background is a dark blue gradient. In the four corners, there are white line-art graphics representing circuit boards or data paths. These graphics consist of straight lines of varying lengths and angles, ending in small white circles, resembling nodes or connection points in a network.
