

# MOD-025-2 Standard Application Guide Now Available

January 4, 2019

**Saint Paul, MN.** Midwest Reliability Organization (MRO) is pleased to announce that under the direction of the MRO Standards Committee, the MOD-025-2 Subject Matter Expert (SME) Team, comprised of volunteers from MRO member organizations, developed a Standard Application Guide for NERC Reliability Standard *MOD-025-2-Verification and Data Reporting of Generator Real and Reactive Power Capability and Synchronous Condenser Reactive Power Capability*.

This application guide serves an important purpose by providing guidance to Generator Owners of asynchronous dispersed power producing resources, with the implementation of the standard. The guidance provides additional clarification, techniques and recommendations on how to accomplish the verification of Real Power and Reactive Power successfully while providing useful data to the Transmission Planner.

###

*Midwest Reliability Organization (MRO) is a non-profit organization dedicated to ensuring the reliability and security of the bulk power system in the central region of North America, including parts of both the United States and Canada. MRO is one of seven regional entities in North America operating under authority from regulators in the United States through a delegation agreement with the North American Electric Reliability Corporation (NERC) and in Canada under similar arrangements. The primary focus of MRO is developing and ensuring compliance with reliability standards and assessing the grid's ability to meet the demands for electricity.*
