

MRO Board Welcomes Newly Elected IOU Sector Director

July 10, 2020

SAINT PAUL, MN. On June 4, 2020, MRO notified its members of an open Investor Owned Utility (large IOU >3,000 MW end-use load) sector seat on the MRO Board of Directors with a term ending December 31, 2022, and called for nominations. Two individuals were nominated for this open position. An electronic ballot was conducted for the IOU sector to elect its board representative, which closed on July 9, 2020. We are pleased to announce that JP Brummond, Vice President, Business Planning for Alliant Energy Corporation, was elected to the MRO Board for the remainder of the open term.

In his current role at Alliant, Brummond oversees transmission planning, environmental services, corporate strategy, energy market operations, and resource development. He also oversees development of various strategic projects, such as grid pilot projects and distribution management system changes. He joined Alliant almost 20 years ago as a financial engineer.

Brummond will be seated today, July 10, and will also serve on the board's Finance and Audit Committee. Please join us in congratulating JP Brummond on his election to the board! We look forward to welcoming him at the board's next meeting, which will be held virtually on September 17, 2020.

###

Midwest Reliability Organization (MRO) is a non-profit organization dedicated to ensuring the reliability and security of the bulk power system in the central region of North America, including parts of both the United States and Canada. MRO is one of six regional entities in North America operating under authority from regulators in the United States through a delegation agreement with the North American Electric Reliability Corporation (NERC) and in Canada under similar arrangements. The primary focus of MRO is developing and ensuring compliance with reliability standards and assessing the grid's ability to meet the demands for electricity.
