

MRO Welcomes Vice President and Engineer for Strategy, Innovation and Finance

September 3, 2019

Saint Paul, MN. Midwest Reliability Organization is pleased to welcome Lam Chung as Vice President and Engineer for Strategy, Innovation and Finance. Previously with Manitoba Hydro, Chung has more than 20 years of experience in engineering, operations, markets, regulatory affairs, and compliance. He has been involved in the ERO serving on the NERC Member Representatives Committee, which provides policy input and elects individuals to serve on the NERC Board of Trustees.

“Lam’s experience working for a Canadian registered entity and with Canadian regulators, as well as with NERC leadership, brings a unique perspective to the cross-border work that MRO does,” said President and CEO Sara Patrick. “This will serve us well as we work with others across the ERO Enterprise towards achieving our vision of a highly reliable and secure North American bulk power system.”

In his role as Vice President and Engineer for Strategy, Innovation and Finance, Chung will focus on aligning MRO around strategies and tactics for improving effectiveness and efficiency, guiding the design and development of new and existing business analytics and practices, and ensuring alignment of delegated functions and strategic initiatives with finance and budget processes. He will also serve on the ERO Finance Group and the ERO Compliance Risk Group

“I am very excited and honored to continue my work addressing risks to reliability on an international level,” said Chung. “I look forward to taking on new challenges and guiding the continuous improvement of the organization.”

Chung earned both his Bachelor of Science in Electrical Engineering and his Masters of Business Administration from the University of Manitoba, and is a licensed Professional Engineer.

###

Midwest Reliability Organization (MRO) is a non-profit organization dedicated to ensuring the reliability and security of the bulk power system in the central region of North America, including parts of both the United States and Canada. MRO is one of six regional entities in North America operating under authority from regulators in the United States through a delegation agreement with the North American Electric Reliability Corporation (NERC) and in Canada under similar arrangements. The primary focus of MRO is developing and ensuring compliance with reliability standards and assessing the grid’s ability to meet the demands for electricity.
