Align & ERO Secure Evidence Locker Project Update

Stan Hoptroff, Vice President, Business Technology
MRO Board Meeting Update
June 25, 2020

RELIABILITY | RESILIENCE | SECURITY

- Major/New Topics
 - Align Benefits
 - Expected Align Functionality R1-R3
 - Updated Timeline and Upcoming Activities
 - Registered Entity Testing
 - Governance Model
 - How to stay informed
 - ERO – Secure Evidence Locker (ERO-SEL)

Moving to a common platform will provide:

- Alignment of **common** Compliance Monitoring & Enforcement Program (CMEP) **business processes**, ensuring consistent practices and data gathering
- A **standardized interface** for registered entities to interact with the ERO Enterprise
- **Real-time access to information**, eliminating delays and manual communications
- **Consistent application** of the CMEP
- **More secure** method of managing and storing CMEP data

Proposed Governance Model For Future Enhancements

Responsibility

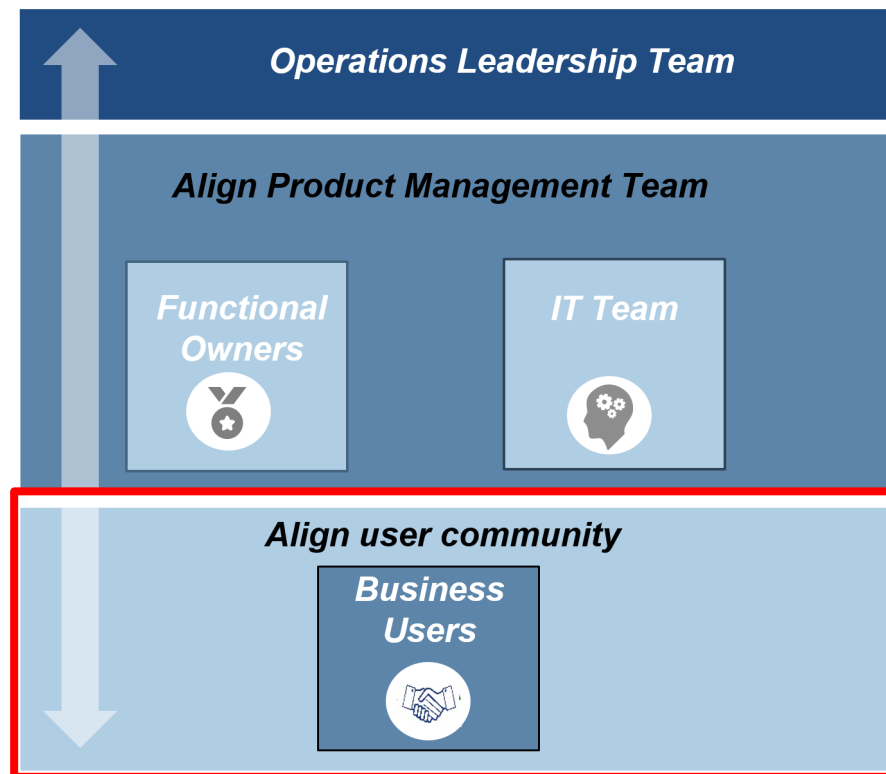

- Provide feedback on the needs and opportunities to improve Align
- Support and promote consistent use of Align among Regional users
- Serve as focal point to collect business needs

Participants

- Two Align users from each Region (for a total of 12 at any one time)
- NERC Align Functional Administrator and Align Business Engagement Analyst
- **Representation from CCC-AWG**

Proposed Activities

- Monthly meetings
- Collaborate and refine enhancement requests

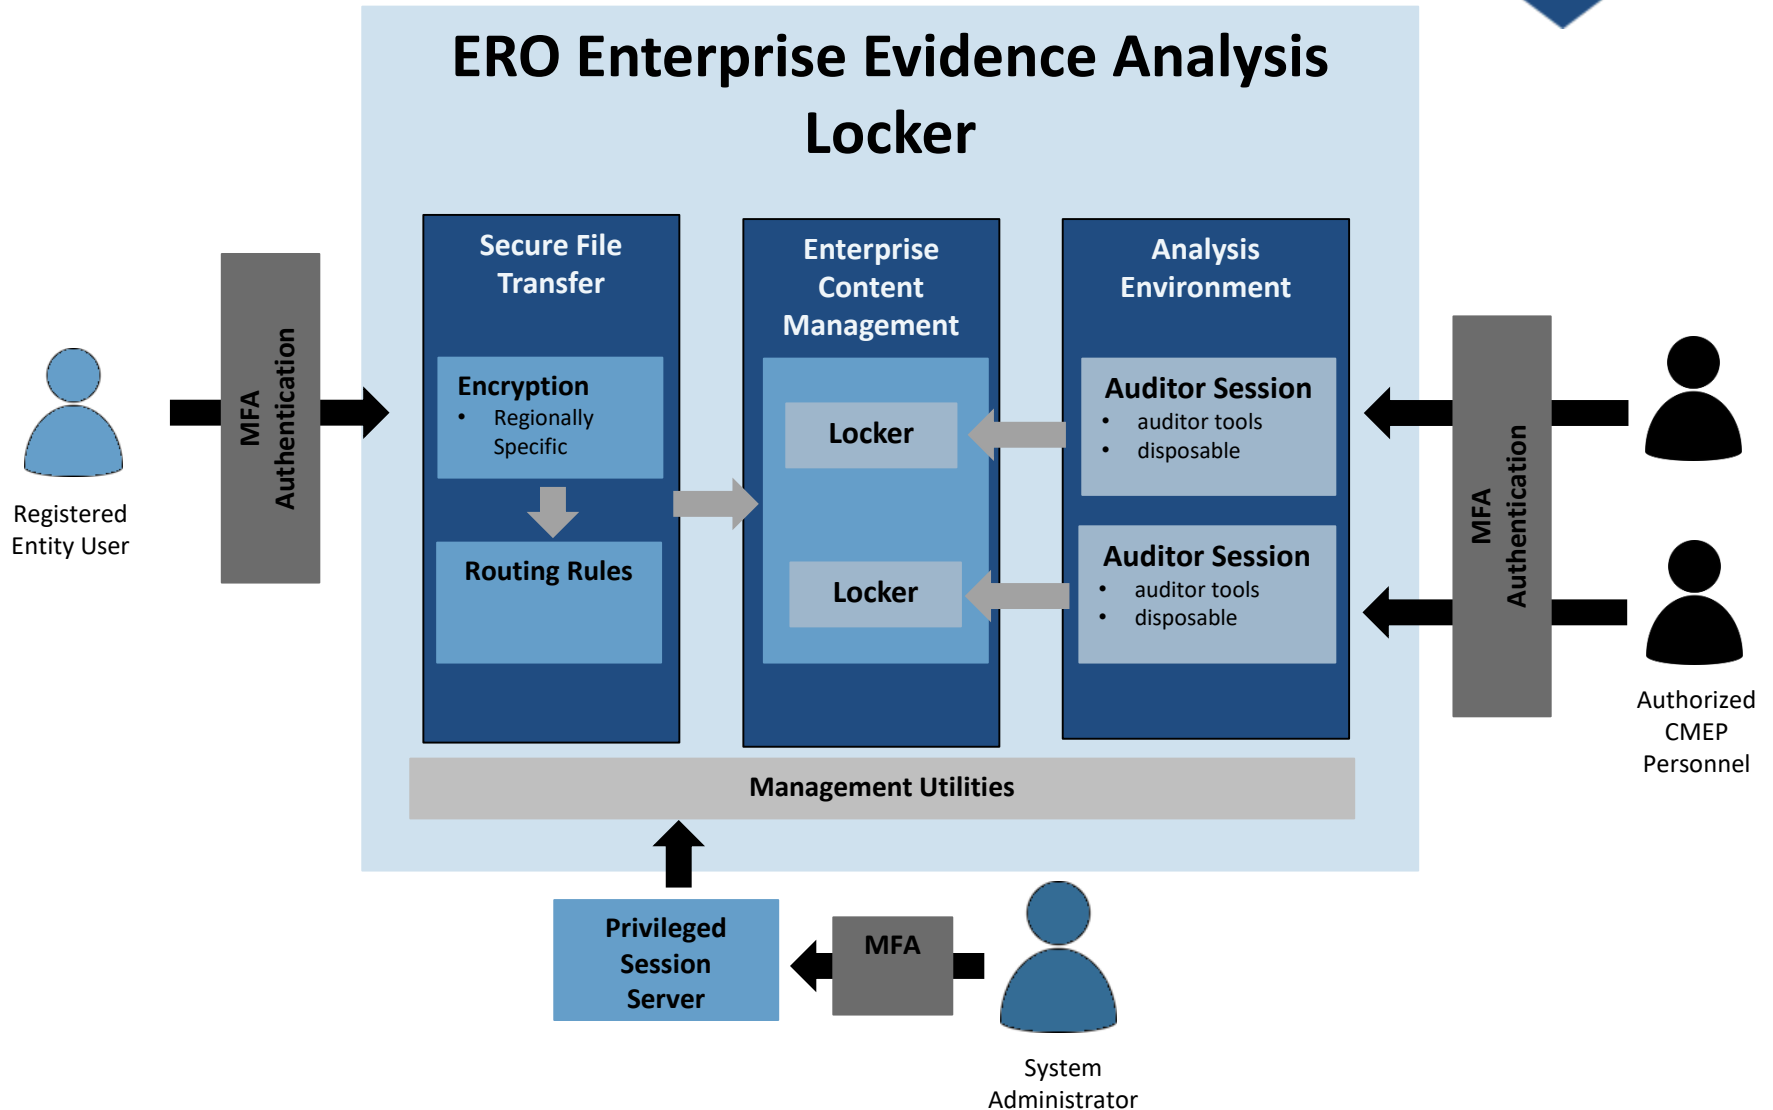

Key communication vehicles

- Align newsletter for Regions and registered entities
- Regional Change Agent Network
- Dedicated project page on NERC.com: [Click Here](#)
- Upcoming CMEP Regional workshops
- Trades meetings, as appropriate

- **Issues Discovered:**
 - Inconsistent processes for requesting, handling and storage of evidence
 - Critical data protection requires additional capabilities beyond our current systems
 - Critical data protection is, and will remain, a CEO-level concern for our industry, hence the “gold standard” expectation
- **Recommended Solution:**
 - Provides content separation in connection with CMEP activities
 - Create a highly secure ERO Enterprise evidence locker
 - Harmonize processes for evidence collection processes
 - Enhance ERO Enterprise work products to reduce risk of a critical data exposure
 - Conduct independent review prior to launch and prior to new releases

- A highly secure, isolated environment
 - Purpose-built to collect and protect evidence
 - Enables submission by authorized and authenticated entity users
 - Provides compartmentalized analysis of evidence in temporary, isolated, disposable environments
 - No interfaces with any other systems
- Evidence
 - Is encrypted immediately upon submission
 - Is securely isolated per entity
 - Is never extracted
 - Is never backed up
 - Is subject to proactive and disciplined destruction policies

- Significantly reduces risk for evidence loss and exposure
- Solution design informed by stakeholder input
- Allows content segregation to significantly enhance security
- Highest commercially available design to conform to National Institute of Standards and Technology 800.171 standard (“the gold standard”)
